DAVID OMETZ SUPERVISORY PATENT EXAMINER Application/Control Number: 10/667,610

Art Unit: 2622

Continuation of 11. does NOT place the application in condition for allowance because: The Applicant's arguments are not persuasive.

On page 8 of the REMARKS, The Applicant argues that the preamble of claim 1 is to be given full weight. The recitation "A bi-directional remote controller" in claim 1 has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

The Applicant argues on page 8 of the REMARKS that "Applicant's invention according to an embodiment is directed to receiving, by a remote controller 30, guidance information from a digital TV 20, and notifying (e.g., displaying) the guidance information on the remote controller 30, as shown in, e.g., Fig. 3 and paragraphs [50], [67], [68] and [104] of the present specification. In contrast, both Kim et al. references are directed to displaying additional information data on a TV itself and thus, these references do not anticipate Applicant's claimed invention". In these arguments the Applicant recites several portions of the specification and Fig. 3 of the instant application to argue that both Kim et al references do not anticipate the Applicant's

Application/Control Number: 10/667,610

Art Unit: 2622

claimed invention; these arguments are not persuasive, because, although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Page 3

On page 7 of the REMARKS the Applicant underlined (emphasized on) some features of the claimed invention and said "these features are clearly absent from both Kim et al references". All these features are clearly disclosed as pointed out in the rejections, the rejections addressed all the claimed limitations; the Applicant fails to provide proper analyses to demonstrate why both Kim references do not anticipate the claimed invention. Both references clearly anticipate the claimed invention as pointed out in the rejections.
